## Adaptive Release Settings

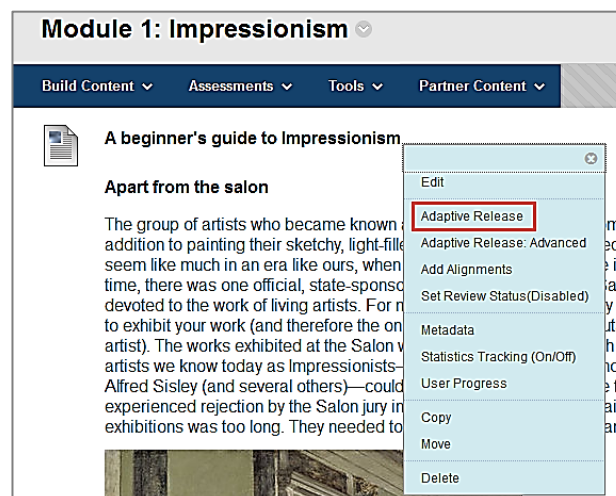

Adaptive Release is a tool available in Blackboard that allows an instructor to set multiple types of availability settings for folders, content items, tests and assignments to name a few.

### Adaptive Release Settings Include:

- **Date and Time release** – reduces the availability of content to a specific time and date range.
- **Membership** – allows access to the content via choosing one or more specific people or by previously set up Groups.
- **Grade** – can be set up to require users to get a passing grade on a quiz before they can access the next set of content.
- **Review Status** – requires the user to mark the item as reviewed before they can access the next set of content.

### To Set Up Adaptive Release

1. Go to the area of your course where the item is located.
2. **Click** on the gray arrow and choose **Adaptive Release**.

3. **Choose** the type of adaptive release you would like to use

1. Date and Time: Input the dates and times that you would like the item to be available for users to access.
2. Membership: Type in or **browse** for the paw prints of users that you would like to be able to view the item. Or, **select** and use the arrow to move the desired *Group* into the *Selected Items* area.
3. Grade: **Choose** the grade center item that you want the users to receive a particular grade on before they can access the *current* item. Then, input the score or percent that the user needs to achieve.
4. Review Status: **Select** the item that the students must check as reviewed before gaining access to the *current* item.
