3. Agency Approvals

All drawings, before being submitted to the College for final acceptance, shall be accompanied by all necessary applications, certificates or approvals from all local, County, State, Federal or other municipal agencies, departments, or commissions having jurisdiction over any phase of the work. Upon acceptance by the College of the contract documents and prior to submission to the appropriate agencies for code

One (1) set will be returned to Consultant with the tentative acceptance or comments of the Vice President for Business and Financial Affairs or designee.

Consultant shall use its best professional judgment to design the Project within the estimated cost. If, at any stage, the estimate indicates a cost in excess of that approved at an earlier stage, Consultant shall notify the Vice President for Business and Financial Affairs of such excess and obtain his or her approval in writing therefore before proceeding with the work. It is agreed that Consultant cannot guarantee such estimates; however, should the lowest responsible bid exceed the Construction Cost of the Project by more than ten (10) percent, it is understood that Consultant shall revise the contract documents to allow the Project cost to meet the Project budget, without any additional costs to the College.

9. Performance of Work

The services to be performed by Consultant shall at all times be subject to the direction and control of the Vice President for Business and Financial Affairs or designee, whose decision shall be final and binding upon Consultant as to all matters arising in connection with or relating to this Agreement. Type of Firm: Small-sized Landscape Architecture & Site Planning firm who concentrates on public site and landscape design.
Contact: Bob Retnauer, RLA, ASLA, Principal
NYS License: Registered Landscape Architect, #1504 (Robert S. Retnauer)

2. COMPANY HISTORY

Founded in 2001, RDA is led by Robert Retnauer, RLA, ASLA, who has over 25 years' experience in site, sports and landscape design. Clients include Architects, Engineers, schools and universities, real estate developers, municipalities, health & hospitality facilities and cultural institutions. Projects include educational campuses, residential & rental communities, commercial businesses, libraries, corporate offices, track and field facilities, athletic fields, sports courts and public streetscapes.

RDA has completed or is currently working on various projects on the three Suffolk Community College campuses including the new Learning Resource Center at Brentwood, the Health and Wellness Center at Riverhead and a series of green infrastructure grant projects at Brentwood and Selden. RDA has also worked on similar green infrastructure projects at Queens College including rain gardens and permeable pavers. We also have a green roof under construction for AvalonBay Communities at a new luxury apartment complex in Great Neck.

3. TECHNICAL APPROACH

Based on our previous work with the Grant application, RDA proposes the following process and sequence of work:

▪ Lindsay Science Building, Selden

The existing roof area at the Lindsay Science Building has already been designed to accept an extensive green roof system such as a sedum tray system. Depending on the cross-section of the roof and how much of a drop there is from the doorway down to the roof surface, the trays can be built up using layers of permeable or impermeable foam, and then pitched towards the roof drains. Care must be taken to ensure enough weight in the trays to hold down the entire system during times of high winds.

There are also many proprietary systems that provide ballast and drainage and RDA will review these with the College to determine the most cost efficient system for the existing roof.

Access out onto the roof may be provided by a raised pedestal paver path or some other type of walking surface to allow users and maintenance personnel into the planted areas.

RDA will also investigate and possibly propose installing a scientific monitoring system that electronically provides temperature and moisture readings of the roof surface and plantings. This system could easily be incorporated into a science class curriculum.

RDA will also help develop and design interpretive signage that will describe the processes and benefits of green roofs. These signs may be located on the roof and also at ground level to encourage people to explore the rooftop.

▪ Peconic Building, Riverhead

As part of our due diligence, RDA and our Structural Engineer will visually inspect the roof over the loading dock area and develop applicable loading calculations. Once the loading calcs are determined, RDA will develop the cross section for the green roof materials.

Design, access, signage and monitoring will be similar to that at the Lindsay Science Building.

Sequence of Work:

Based on completion dates listed in the RFP, RDA proposes the following schedule (**please note that this schedule is subject to adjustment based on time and weather constraints):

- | | |
